CS 4800 Spring 2024 Weekly Report
Week (Jan 16 – 30) Note: This report (ONLY) covers two weeks, the rest is for one week

Please fill out this form very carefully, as it is part of your grade for the team activity.

1. What were you able to achieve during this period? (Look into this based on the sprints you had set up to complete for this period)

I was able to talk to some other people about my project which helped consolodate what I want to do. I have been able to get a few sketches of what I want the web application to look like, as well as seting up the file structure and a GitHub repo.

If there were any challenges, what were they?

I haven't faced any challenges yet except for finding a partner to help me out with this project, which I failed on. I am not particularly worried about this, but it is unfortunate that I did not get a partner to work on this project with. I think it is really cool and will be something that has a positive impact on the world.

2. What do you plan to achieve next period? (Look into this based on the sprints you would like to set up to complete for the next period)

I want to have the basic framework of the visitor user interface to be up. This would look like having a few React components that are mostly filled out with a few more skeleton components. I want to have a sketch of the historic site's user interface as well. That will be a much harder than the visitor user interface.

3. How do you evaluate your progress toward completing the project by the end of the semester?
[X] On schedule
[ ] Slightly behind
[ ] Far behind – How can we address this?
